ECOLIT
CONSTRUCTION SYSTEM

PROCESS CONFIDENCE SHEET
FOR PERMIT-DRIVEN BUILDER TEAMS

ONE COORDINATED PATH

From homeowner proposal to final inspection

ECOLIT supports the builder through permit coordination, delivery timing, field execution, and inspection readiness using one framing system and one communication logic.

BEST FIT

California permit-ready ADU workflow

Stamped structural package, calculations, coordinated wall and roof assemblies, Title 24 inputs, and rapid comment support when jurisdictions ask for more.

- SE STAMP AVAILABLE
- TITLE 24 INPUTS
- INSPECTION GUIDANCE

01
Early planning
Feasibility, site data, and framing alignment.

02
Structural set
Plans, calculations, assemblies, and details.

03
Permit review
Clarifications that keep plan check organized.

MODULE 01

Frame + Permit Pack

Structural package with calculations, standardized nodes, connection logic, and coordinated assemblies.

MODULE 02

Installation Support

Use your crew with our supervisor or hand over erection when the builder wants one accountable install path.
